\$100K - \$200K Vacant Land - For Sale	118	2,150	43	6	3rd

1-MONTH REPORT FOR YOUR LISTINGS

DETAILED ANALYSIS: PUBLISHER COMPARISON CHART

This report shows a comparison of activity generated from your listings online.

Views, visits, and inquiries are based on the number of listings displayed by the publisher. If the publisher displays a listing provided by a source other than ListHub or if a listing is not displayed due to an uploading error, the activity data for that listing is not included in ListHub reports.

Terms are defined on the last page of this report.

1-MONTH REPORT FOR YOUR LISTINGS

EXPLANATION OF TERMS

→ Explanation of Terms

Agent ID - Each agent has a unique user ID per MLS and per office. Since it is possible for some agents to hold more than one agent ID, the ID is included for the purpose of distinction.

Publisher labeled "Organic" - an instance when the consumer was taken to the property page hosted by ListHub by a means other than one of the publishers, such as when the consumer searches for a specific property address in a search engine and is taken directly to the property page.

Click-Throughs (Visits) - occurs when a consumer is redirected from a publisher website to a property page chosen by the company.

Inquiries - an event where the consumer starts an email interaction with the broker or agent using a link on the website. This would result in the broker/agent receiving an email with a return email address for the consumer. Includes the number of times a consumer clicked on "Click to view phone number" or called the listing broker or agents via a mobile app.

Listing Count - the number of active listings that each agent has on the date of the report or the number of active listings in a property category on the date of the report. The Listing Count may include properties that are no longer active but were at some point active during the time period of the report.

Listing Inventory - the total active listings that are being pulled from the MLS each month.

Not Applicable - this indicates that the website does not include the feature that would generate metrics in this category. For example, some websites do not have a property detail page for each listing, and therefore the reports would not display "views" for that site.

Not Provided - this indicates that the website does not provide this category of data for inclusion in the reports.

Performance Rank - unique algorithms determine the performance of listings within certain property categories as well as the performance of listings for each agent. This algorithm factors in the number of listings, the number of views, visits/click-throughs, and the number of inquiries.

Property Views - occurs when a consumer clicks on the thumbnail view of a property to view more details, while still on the publisher website.

 - indicates that the traffic reported by the site includes traffic from mobile applications.

 - Metrics Alert. Our systems monitor the quality and accuracy of metrics we receive from publishers. If we receive metrics data that is incorrect or requires validation, the Metrics Alert Icon will display beside that publisher on your report, along with details about the issue.
